## Android – IMAP

The look and feel of each Android device can be different based on your software version and wireless vendor. The sample below is one version and yours may look different, but the steps should be the same or very similar.

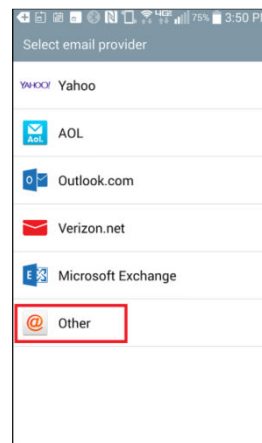

1. Navigate to **Settings**.

2. Select **Add account**

3. Select **Other** as the *mail provider*

4. Enter your full email address and password

(in the image, your\_domain.com is the part of your email address that follows the "@" sign)

The screenshot shows the 'Other email' setup screen. At the top, it says 'Other email'. Below that, there are two input fields: 'Email address' containing 'username@your\_domain.com' and 'Password' containing a series of dots. A 'Show password' checkbox is located below the password field. At the bottom, there are two buttons: 'Manual setup' and 'Next'.

5. Select **IMAP4** and click **Next**

The screenshot shows the 'Select account type' screen. It has two options: 'IMAP4' with a blue radio button and 'POP3' with a grey radio button. At the bottom, there are two buttons: 'Back' and 'Next'.

6. Enter the following for *Incoming Server Settings*:

**IMAP4 server:** mail.watvc.com

(in the image, your\_domain.com is the part of your email address that follows the "@" sign)

**Security type:** Off

**Port:** 143

**Username:** Enter your full email address

**Password:** Enter your password

7. Click **Next**

The screenshot shows the 'Incoming server settings' screen. It has several fields: 'IMAP4 server' with 'mail.your\_domain.com', 'Security type' set to 'Off', 'Port number' set to '143', 'Username' with 'username@your\_domain.com', and 'Password' with a series of dots. A 'Show password' checkbox is located below the password field. At the bottom, there are two buttons: 'Back' and 'Next'.

8. Enter the following for *Outgoing Server Settings*:

**IMAP4 server:** mail.watvc.com

(in the image, your\_domain.com is the part of your email address that follows the "@" sign)

**Security type:** Off

**Port:** 25

**Username:** Enter your full email address

**Password:** Enter your password

9. Click **Next**

## Android - POP3

The look and feel of each Android device can be different based on your software version and wireless vendor. The sample below is one version and yours may look different, but the steps should be the same or very similar.

1. Navigate to **Settings**.

2. Select **Add account**

3. Select **Other** as the *mail provider*

4. Enter your full email address and password

(in the image, your\_domain.com is the part of your email address that follows the "@" sign)

The screenshot shows the 'Other email' setup screen. At the top, the status bar displays the time as 3:52 PM and 74% battery. The screen has a title bar 'Other email'. Below it, there are two input fields: 'Email address' containing 'username@your\_domain.com' and 'Password' containing a masked password '\*\*\*\*\*'. A 'Show password' checkbox is located below the password field. At the bottom, there are two buttons: 'Manual setup' and 'Next'.

5. Select POP3 and click **Next**.

The screenshot shows the 'Select account type' screen. The status bar at the top shows 11:57 AM and 86% battery. The title bar says 'Select account type'. There are two options: 'IMAP4' with an unselected radio button and 'POP3' with a selected radio button. At the bottom, there are 'Back' and 'Next' buttons.

6. Enter the following for *Outgoing Server Settings*:

**SMTP server:** mail.watvc.com

(in the image, your\_domain.com is the part of your email address that follows the "@" sign)

**Security type:** Off

**Port:** 25

**Username:** Enter your full email address

**Password:** Enter your password

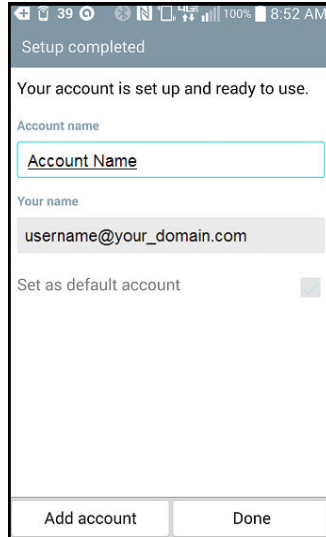

9. Click **Next**

The screenshot shows the 'Outgoing server settings' screen. The status bar at the top shows 11:58 AM and 86% battery. The title bar says 'Outgoing server settings'. There are several fields: 'SMTP server' with 'mail.your\_domain.com', 'Security type' set to 'Off', 'Port number' set to '25', 'Require sign-in.' checked, 'Username' with 'greg.hood@joinmomentum.com', and 'Password' with a masked password '\*\*\*\*\*'. At the bottom, there are 'Back' and 'Next' buttons.

10. Add an *Account Name*.

11. Click **Done**.

## iPhone – IMAP

The look and feel of each iPhone device can be different based on your software version and wireless vendor. The sample below is one version and yours may look different, but the steps should be the same or very similar.

### 1. Local and Launch **Settings**

### 2. Select **Mail, Contacts, Calendars** from the *Settings* menu.

### 3. Select **Add Account**

4. Select **Other**

5. Select **Add Mail Account**

6. Enter Name, **Email**, **Password**, and **Description**

7. Click **Next**

8. Click **IMAP** and enter the following:

**Host Name:** mail.watvc.com

(in the image, your\_domain.com is the part of your email address that follows the "@" sign)

**Username:** This is your email address

**Password:** This is your email password
